

AMG is a global critical materials company at the forefront of CO₂ reduction trends. AMG produces highly engineered specialty metals and mineral products and provides related vacuum furnace systems and services to the transportation, infrastructure, energy, and specialty metals & chemicals end markets.

AMG Advanced Metallurgical Group N.V. consists of two operating divisions, AMG Critical Materials and AMG Technologies.

AMG Critical Materials produces specialty metals, alloys and high performance materials, including aluminum master alloys and powders, chromium metal, ferrovandium, antimony, lithium, tantalum, niobium, silicon metal and natural graphite. The EU identifies critical materials based on economic importance and supply risk*. These materials are of significant importance to the global economy and are available in limited supply. End markets for these materials include aerospace, automotive, electronics, energy efficiency, green energy, infrastructure and specialty metals & chemicals applications.

AMG Technologies produces titanium aluminides and titanium alloys for the aerospace market; designs, engineers, and produces advanced vacuum furnace systems; and operates vacuum heat treatment facilities, primarily for the transportation and energy industries.

With approximately 3,300 employees, AMG operates globally with production facilities in Germany, the United Kingdom, France, Czech Republic, United States, China, Mexico, Brazil, India, Sri Lanka and Mozambique, and has sales and customer service offices in Russia and Japan.

*Report on Critical Raw Materials for the EU
